

Following is the latest update regarding PSI Testing Centers!

The following PSI testing sites re-opened April 13, 2020.

EUGENE
PORTLAND
WILSONVILLE

All remaining PSI testing sites will re-open May 1, 2020.

PSI will adhere to the following guidelines:

- Follow CDC guidelines regarding social distancing
 - This will be done by reducing the volume to about half of the site capacity; often with a seat in between testers. Candidates will be 6 feet apart.
 - Limiting the number of people (including our proctors to ensure that we do not have more than 10 at any location).
- Proper sanitation
 - Disinfect and wipe down all testing stations after use.
- PSI has relaxed its policy on the use of facemasks and gloves based on recommendations of the CDC
 - Candidates will be required to provide their own facemasks and gloves these will not be provided by PSI. Facemasks and/or gloves is not mandatory but highly recommended.
 - Facemasks will need to be removed during check-in process to verify identify and take photo.
 - Candidates are responsible for disposing of used facemasks and gloves securely outside of the test center.
